Premium Hot Tubs, Built Tough and Built to Last. [www.canspa.com](http://www.canspa.com)

Canspa takes pride in using only the best components in the industry, such as genuine Lucite Xtra Acrylic sheets featuring Microban® antimicrobial product protection. Microban® is an antimicrobial protection that provides resistance to the growth of bacteria, which causes odour and stains on the spa's surface.

Canspa features Waterway hydrotherapy jets, pumps and filters for exceptional durability.

#### Microprocessor Control Panel

Finger-tip controls allow instant adjustments to water temperature, preprogrammed filter modes, individual pumps, blower and lighting.

#### Water Diverter Valve

Send the flow of water instantly to separate jets around the spa with a simple turn of the dial.

#### Three -Ply Fabricated Shell

Every Canspa spa is manufactured to the highest standards using a single sheet, three-ply acrylic and ABS shell, combined with a fiberglass backing for added strength and durability.

#### Deep Soaking Seats

Canspa designs each comfort zone with a variety of jets from vigorous to gentle to achieve a complete body massage.

#### Hot Air Turbo Injector

Boosts the power of the water jets by diverting the warm air.

#### Air Flow Control

Adjust the massage action and jet pressure by changing the air flow.

#### Vibrant Colour

Canspa offers a variety of colour choices.

#### Full-Foam Insulation

Foam between the spa shell and cabinet insulates and retains heat, while protecting the plumbing and improving energy efficiency.

#### Plumbing Harnesses

Every fitting is secured and pressured tested. The lines are routed throughout the spa to allow for precise jet allocation and maximum efficiency.

#### Water Filtration

For complete flow-through purification Canspa uses a single or dual canister filter system.

#### Solid Frame Construction

A Canspa spa is built from the ground up with a totally enclosed floor and reinforced framing.

#### Shut-off "T" Valve

"T" water valves are located in front of pumps to prevent water loss during any maintenance or repairs.

#### Drainage System

Canspa conveniently located the drain system at the bottom of the spa for easy maintenance

#### Ozone Cleaning System

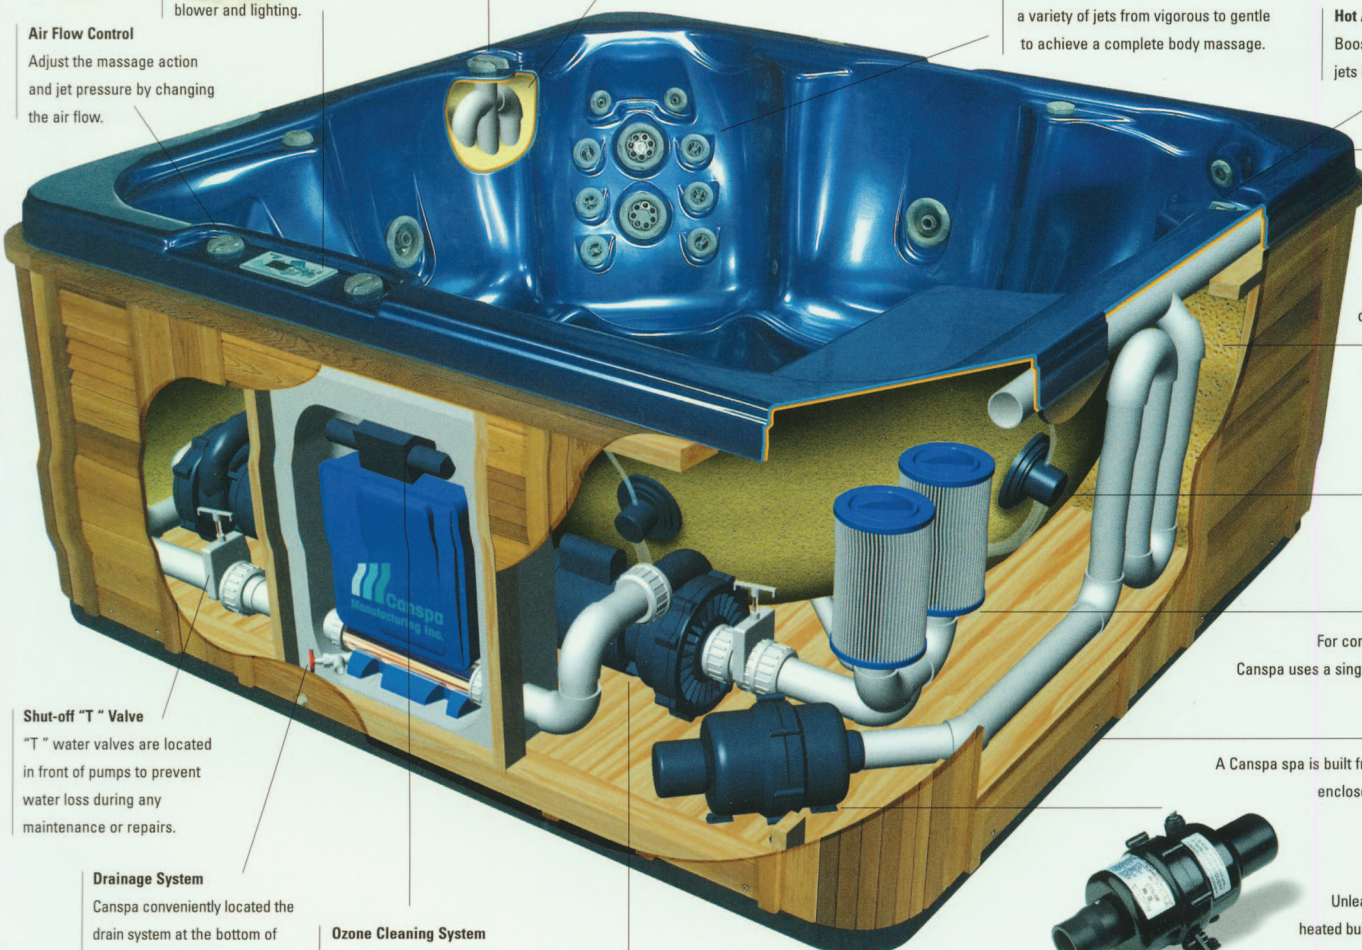

An ultraviolet light system acts to ozone the water at regular intervals disinfecting and controlling bacteria in the water.

#### Energy Efficient Motors

Quiet and powerful, 4.5Hp or 5Hp pumps provide consistent water pressure throughout the spa.

#### Heater Air Blower

Unleash thousands of tiny heated bubbles into the air and water jets to relax pressure points.
